If you guys end up wanting to do some modeling, our modeling guy in region 10 retired, but James Thurman (email below) is our OAQPS expert. I'm happy to help get him involved if you want any assistance on modeling or you can reach out to him yourself.

Katie

Stef

Please have R10 include or coordinate with James Thurman on any air quality modeling discussions as he would be the AERMOD expert in toxics modeling from AQMG.

Thanks,

Tyler

**Importance:** High

Tyler, Liz, and Lew,

As I mentioned at staff meeting yesterday, Region X is working to help Oregon DEQ navigate a neighborhood emissions concern with an art-glass manufacturer in Portland, Oregon.

Katie McClintock has been on point for the Regional office, and has reached out looking for assistance below. Could you each take a look and see if your groups can be of assistance to Katie and ODEQ? Also, if you think other groups should be involved, would you please pass this to the appropriate person(s)?

Thanks very much!

Stef

**Subject:** RE: Meeting with Bullseye Glass

Thanks Stef –

Yeah I am in Portland. I think we have a few needs from those groups.

Ambient – We need to decide value of adding monitors near other sources vs source modeling. Would they have thoughts?

Source modeling – we are trying to figure out the best way to model impacts to play out various control scenarios. Is there a contact who can help talk me or someone else through this?

Inventory groups – Is that the people who can come up with lists? Our OR contact is wrestling with this. Her name is jacyln palermo. [PALERMO.Jaclyn@deq.state.or.us](mailto:PALERMO.Jaclyn@deq.state.or.us). She is under governor direction to come up with a list of people who emit toxics in air, water or land. Could this group help her?

Thanks. I am still not sure what everyone does so I appreciate the help.

Katie,

I just checked your VM and it states that you are out of the office. In case you are in Portland, I want to re-iterate that I have access to the Ambient measurement, source modeling, and inventory groups here at EPA. Just let me know your needs and we'll get you in touch with the right people.

Thanks,

Stef

That's fine. I'm available as a resource, and will respond if asked a direct question.

Thanks!

And Stef, since you missed the premeet, the main takeaways from the premeet were that we are being collaborative/cooperative, not aggressive. And that I think in general us epa folks are only going to get involved if there are specific questions for us and deq wants us to weigh in. I think that is the deal that stephanie discussed with them. There are going to be a lot of high level players here (main negotiator is head of oregon deq) so we will see how the conversation unfolds and what, if any role, we play.

Katie:

I just left a message.

In order for the folks on the phone to see the slides, we need to set up a live video link.

Below is the information.

Please note there is a different call-in number. I do not know who from EPA is attending so please circulate.

**Jeffrey Hunter | Perkins Coie LLP**
